148mm x 210mm

A6
105mm x 148mm

DL
99mm x 210mm

Business Card
85mm x 55mm

Checklist for sending artwork to print:

1. Artwork needs to be saved in PDF format;
2. Artwork needs to contain hi-res elements;
3. File needs to include 3mm Bleed & crop marks;
4. Large Format needs to have 10mm bleed;
5. Artwork needs to be sent in the size you wish to have it printed.
6. Adopt the "safe area" when close to fold marks.
7. Images less than 1500kb (1.5MB) are usually not of good enough quality to print on large format printers. Images from web pages are usually not good enough for printing purposes. Canva is best suited for online graphics. Print graphics require a greater degree of clarity and resolution.
8. If you don't know how to create 3mm bleed around the edges, just make sure to keep detail at least 5mm from the edge.
9. If in doubt - ask

Crop Marks

To indicate where the paper will be cut.

3mm Bleed

Extend your artwork into this bleed area.

Page Edge

This is where the page will be cut.

Safe Line

Details need to be within this line.
